## GET GOOD WILL OF NATIVES.

How Americans May Succeed In the Philippines.

London, April 17.—The Daily Chron-kle publishes this morning an inter-view with Lieutenant General Sir An-drew Clarke, agent general for Vic-toria and Tasmania, and former gov-ernor and commander-in-chief of the

cornor and commander-in-chief of the Strails Settlements, regarding American policy in the Philippines.

Sir Andrew urges a thorough understanding of the native character and a government, so far as possible, by native institutions. The Americans, in his opinion, should first discover Again-aldo's sources of supply and then turn these into agencies of trade for the settlement of the country. They should show the natives that this would be a better outlet for capital, and they would thus be depriving the enemy of the sinews of war.

After that, he continues, they should buy out the religious orders, with the sanction of the pope, and attach the secular clergy in some way to the administration, securing their powerful influence.

"Underlying every government," says
Sir Andrew, "must be the good-will of
the natives; then, with carefully se-lected administrators, the United States
